Abhinav Kalala

Hyderabad, Telangana, India

+91 9390270780 | abhinavkalala123@gmail.com | github.com/Abhinav542004 | linkedin.com/in/abhinavkalala

Professional Summary

Computational Engineering graduate from **IIT Hyderabad** with a solid foundation in **SQL, Python, Power BI, and statistical modeling**. Experienced in building end-to-end analytical pipelines, complex SQL querying, and interactive business intelligence dashboards to translate raw data into actionable insights. Seeking an entry-level **Data Analyst** role to solve data-driven business problems.

Education

Bachelor of Technology, Computational Engineering 2021–2025
Indian Institute of Technology Hyderabad, Telangana

Intermediate, MPC, Telangana State Board 2019–2021
Narayana IIT Academy, Raviryala, Hyderabad

Class X, Telangana State Board 2018–2019
Gowtham Model School, Adilabad, Telangana

Skills

Programming:	Python, SQL, C++, C
Data Analysis:	Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis
Data Visualization:	Power BI, Excel, Matplotlib, Seaborn, Data Visualization, Dashboard Development
Machine Learning:	Linear Regression, Logistic Regression, KNN, SVM, Decision Trees, Random Forest, AdaBoost, XGBoost, K-Means, PCA, ANN, CNN
ML Techniques:	Feature Scaling, Imputation, One-Hot Encoding, Train-Test Split, Cross-Validation, Model Evaluation, Hyperparameter Tuning, GridSearchCV
Databases & Tools:	MySQL, SQLite, Scikit-learn, Jupyter Notebook, Git, Linux
Soft Skills:	Analytical Thinking, Problem Solving, Teamwork, Communication, Adaptability

Projects

TechNova Sales Analytics & Power BI Dashboard 2026
SQL | MySQL | Power BI | Data Cleaning | Data Analysis

- Cleaned and transformed transactional sales data using **MySQL**, identifying duplicate orders with **ROW_NUMBER()** and handling missing city and discount values.
- Engineered numerical discount, profit, and date-based features including **order day, month, and year** to prepare the dataset for sales analysis.
- Analyzed **458 cleaned sales records** across products, categories, cities, sales representatives, and monthly trends, identifying **Laptop** as the highest-revenue product and **Electronics** as the leading category.
- Built an interactive **Power BI dashboard** to visualize revenue, profit, product performance, geographic sales, sales representatives, and monthly sales trends for business analysis.

Diabetes Prediction & Classification Oct–Dec 2025
Binary Classification | Python | Pandas | Scikit-learn | SMOTE

- Performed exploratory data analysis on **768 patient records** with 8 clinical features, analyzing distributions, correlations, and feature relationships for diabetes prediction.
- Preprocessed clinical features by handling invalid zero values, detecting outliers using the **IQR method**, and standardizing numerical features using **StandardScaler**.
- Addressed class imbalance using **SMOTE** and trained Logistic Regression, KNN, and Gaussian Naive Bayes classifiers for binary diabetes classification.
- Compared models using accuracy, precision, recall, and F1-score; **Logistic Regression achieved 75% accuracy and 0.66 F1-score** on the test set.

Certifications

Data Science	TEKS Academy	2026
Data Science Project-Based Learning	GeeksforGeeks	2025
Introduction to Generative AI	Simplilearn SkillUp (Powered by Google Cloud)	2025

Positions of Responsibility

Volunteer at Elan & n Vision	Assisted visiting students with campus navigation and event coordination.	2023
Volunteer at Milan Sports Fest	Supported coaches with track and field event setup and logistics.	2022

Achievements

JEE Advanced All India Rank 4440 2021
Recognized as an All-Rounder in Athletics during B.Tech at IIT Hyderabad 2022–2025
